

Web Development

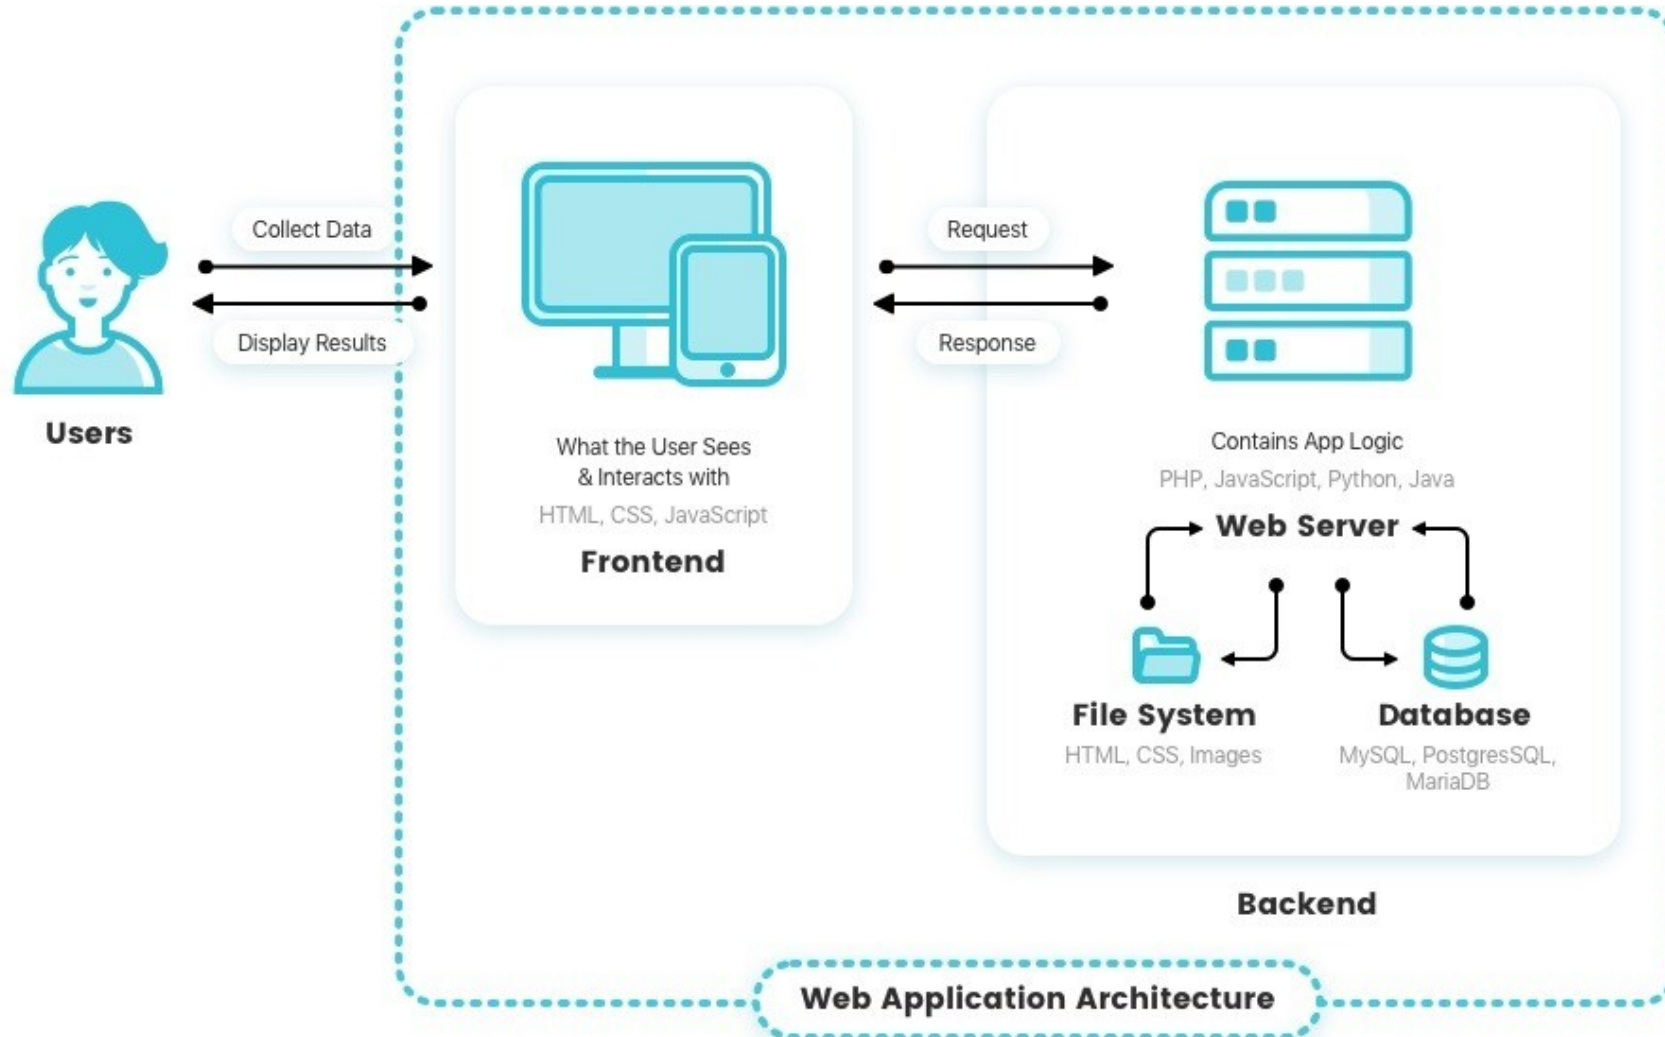

Noor Ajmir Tanvir
CSE, RUET

Lecture 1

How web works
Frontend and Backend
Setting up Visual Studio
Code
First HTML project

How web **works**?

Visual Studio Code setup

- <https://code.visualstudio.com/>

What is **tags** in HTML?

- Tags are the building block of HTML page.
- It gives the structure to our pages
- There are two type of tags/element in HTML

- 
- Text
 - Title
 - Paragraph
 - Body
 - List
 - Image
 - Form

Resources

- https://www.w3schools.com/tags/ref_byfunc.asp

Thank you
